

Menteon learning Inc : An Introduction

Menteon Learning, Inc. is pleased to announce a partnership with Xumri Inc. Xumri will assist Menteeon with its go-to-market strategy, market research and business development efforts for the Menteeon Learning Suite of applications. The Menteeon solution is a 100% cloud-based solution to help students accelerate learning, retain knowledge and excel at tests with confidence.

"Initially, Xumri Inc. will conduct seven focus groups with high school teachers, students and parents in the San Francisco bay area to gather input. Following this, Xumri will collaborate with Menteeon to create a go-to-market strategy and assist Menteeon in executing business development, technical account management and post-sales support functions with high schools, community colleges and universities." Sundar Nathan, CEO Menteeon Learning.

The vision of Menteeon Learning is to help students at any level accelerate learning, retain knowledge and excel at tests with confidence. We believe that every learner has a dominant learning style – auditory, visual, kinesthetic or project-based. The Menteeon solution is 100% cloud-based and enables various learning styles anywhere, on any internet-enabled device. Students use Menteeon Navigator to chart a journey through rich, comprehensive online materials with interactive mind-maps, e-books, video, audio and text. Self-assessment with flashcard-based tests and rich analysis tools are available (no software required!). Menteeon Analytics helps teachers and parents understand learners' performance based on actual data from the learning paths taken by students. Teachers can then alter their teaching styles and address challenging topics in tailored ways for specific students. Lastly, Menteeon Author is an easy-to-use visual tool for teachers to package knowledge and share it in the Menteeon solution for their students to access.
